CEDAR HEALTHCARE, LLC

Admin Console UI/UX Design

The private console Cedar staff use to keep the website up to date, on desktop and mobile.

Prepared for Cedar Healthcare, LLC
November 2026

OVERVIEW

What the console does

The admin console is for website content only. Cedar staff sign in on their own private page, which is not linked from the public website. From there they update the page, answer enquiries, manage testimonials and send newsletters. On phones it uses the same app style bottom menu as the public site.

FOUR EVERYDAY JOBS

1. Update the page

Edit the hero image, tagline and section text, FAQs, privacy policy and terms of use. Preview, save a draft, then publish when ready.

2. Answer enquiries

Care requests from the contact form arrive in one inbox. Reply by email, mark as replied or delete.

3. Manage testimonials

Clients submit stories on the public site. Staff publish, unpublish, edit or delete each one.

4. Send newsletters

Write a subject and message, send a test to yourself, then send to all subscribers.

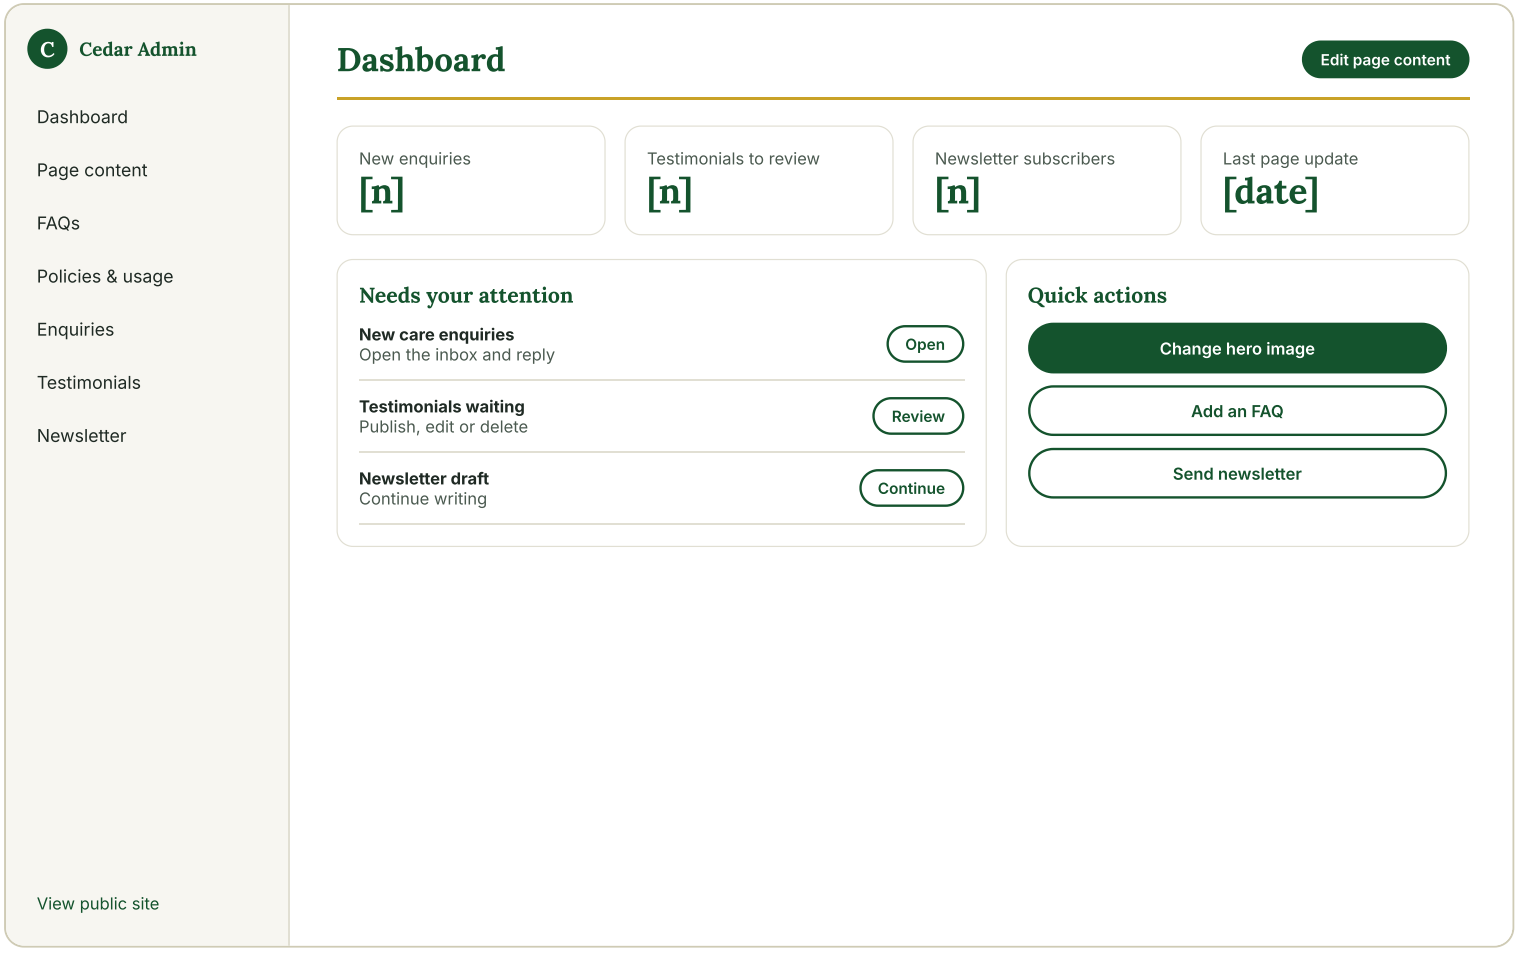

Included in this document: Dashboard, Page content, Enquiries, Testimonials and Newsletter on desktop, plus Dashboard, Page content and Reviews on mobile. **Next design round:** dedicated screens for FAQs, Policies and usage, and mobile Enquiries and Newsletter.

Text shown in [square brackets] is sample content that will be replaced with Cedar Healthcare's real content. Photos are placeholders.

DESKTOP

Dashboard

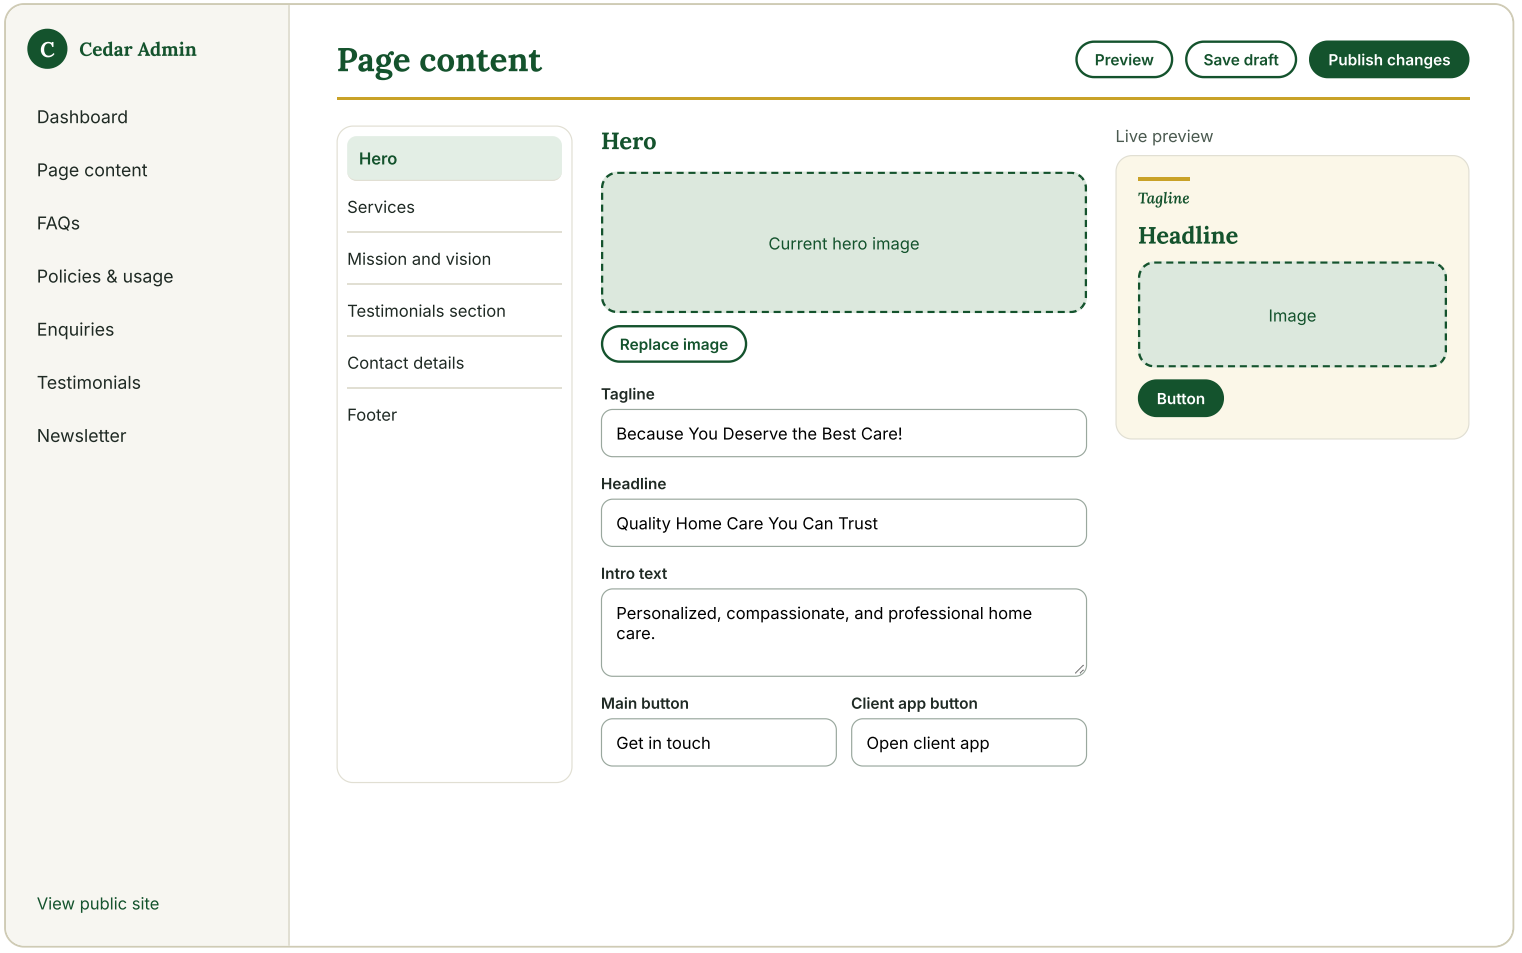

- A calm home screen that shows what needs attention today.
- Four counters: new enquiries, testimonials to review, subscribers and the date of the last page update.
- Shortcuts take staff straight to the most common jobs.
- The left menu is always visible and has a link to view the public site.

DESKTOP

Page content editor

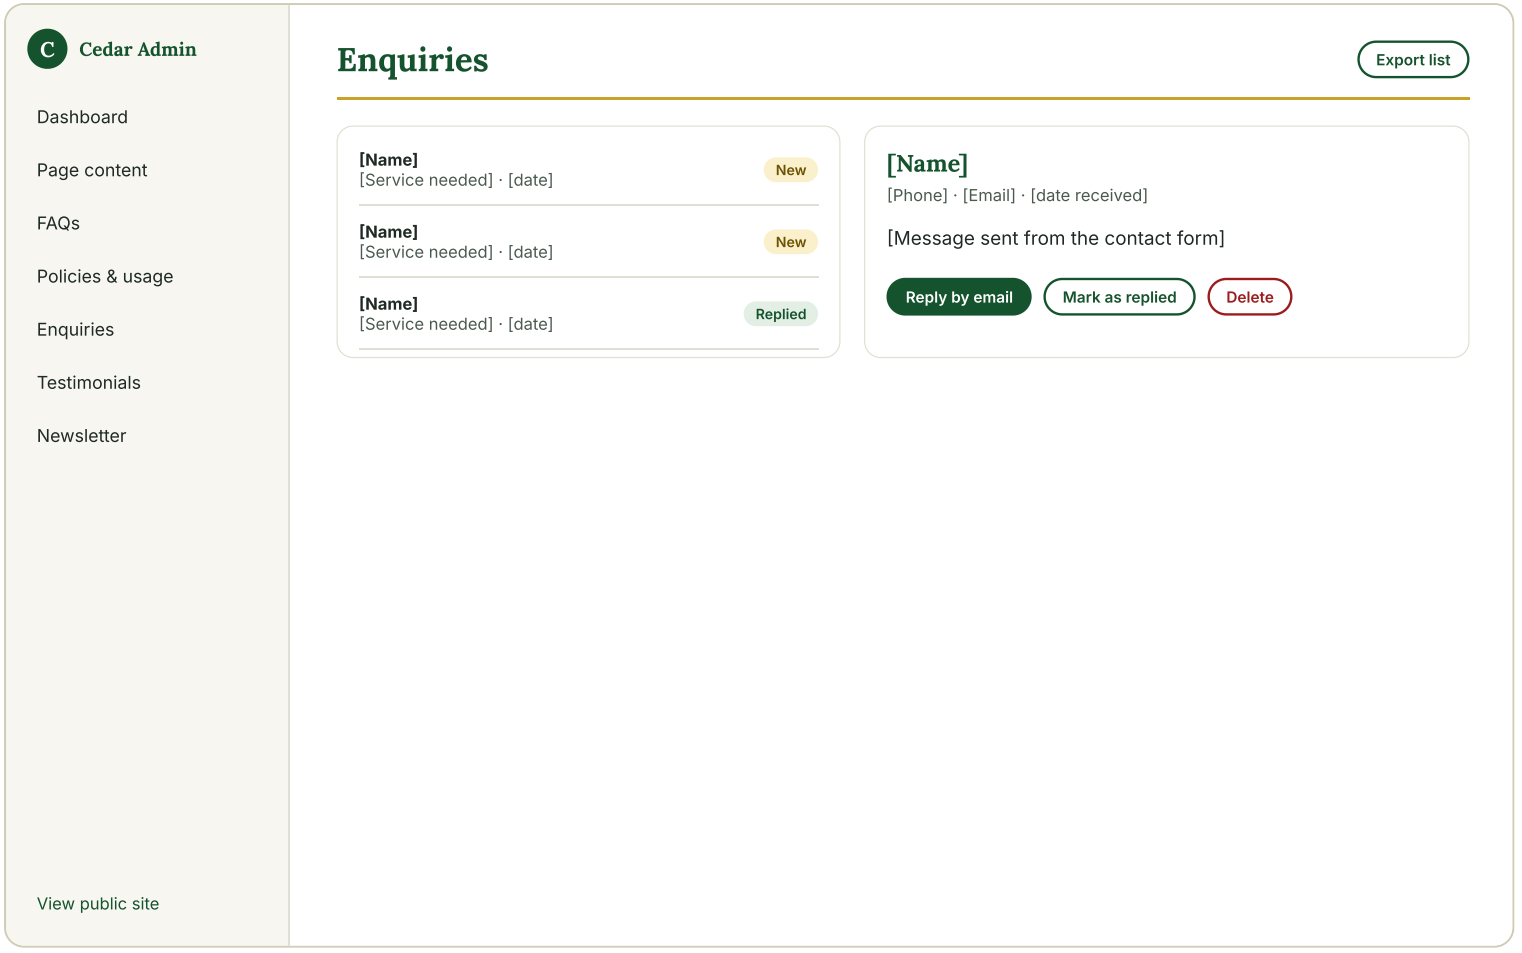

- Choose a section on the left: hero, services, mission and vision, testimonials, contact details or footer.
- Replace the hero image and edit the tagline, headline, introduction and button labels.
- A live preview on the right shows how the change will look.
- Save a draft to come back later, or Publish changes to update the public website.

DESKTOP

Enquiries inbox

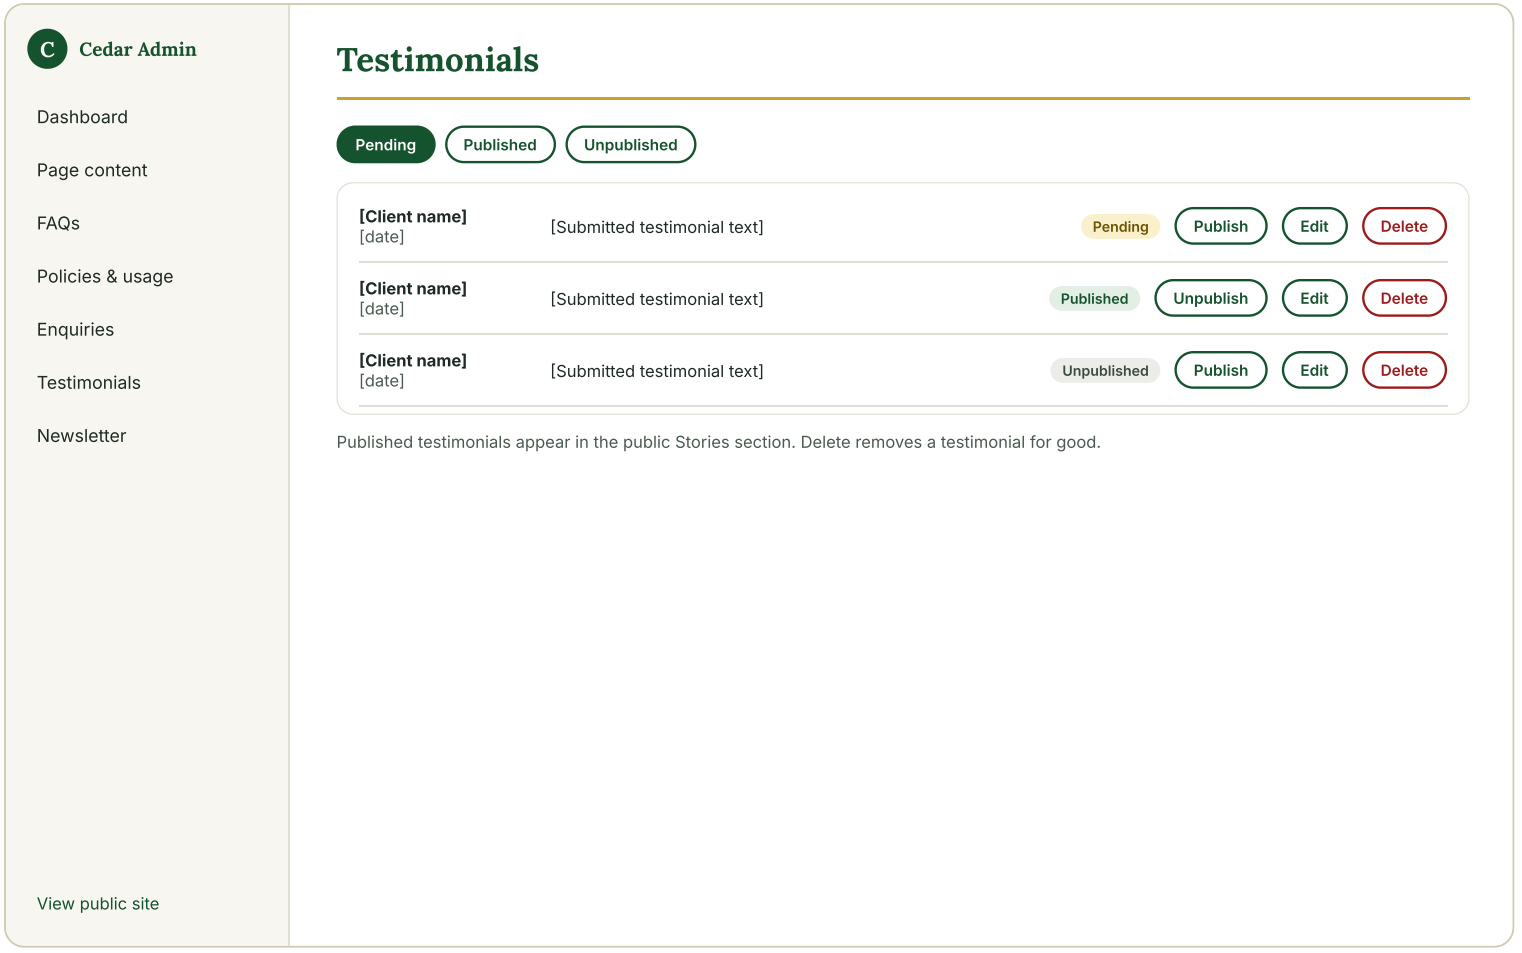

- Everyone who contacts Cedar through the website appears in this list.
- New enquiries are tagged so nothing is missed.
- Open one to see the full message and contact details.
- Reply by email, mark it as replied, or delete it.

DESKTOP

Testimonials

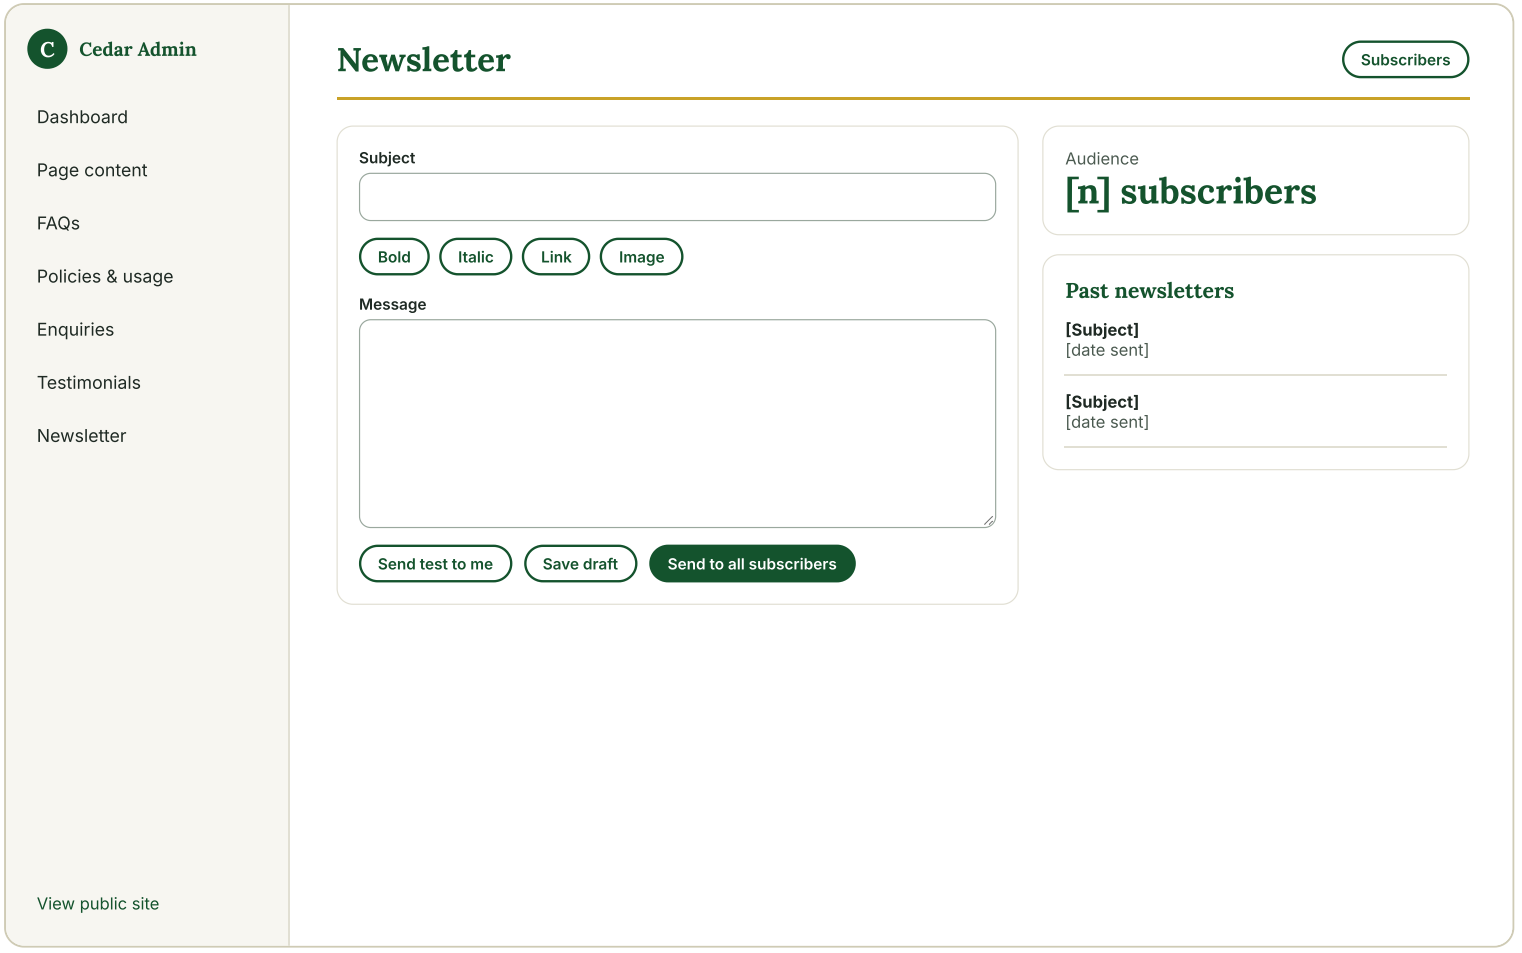

- Three tabs keep things tidy: Pending, Published and Unpublished.
- Publish puts a testimonial in the public Stories section. Unpublish hides it again.
- Edit lets staff fix spelling before publishing.
- Delete removes a testimonial for good, after a confirmation.

DESKTOP

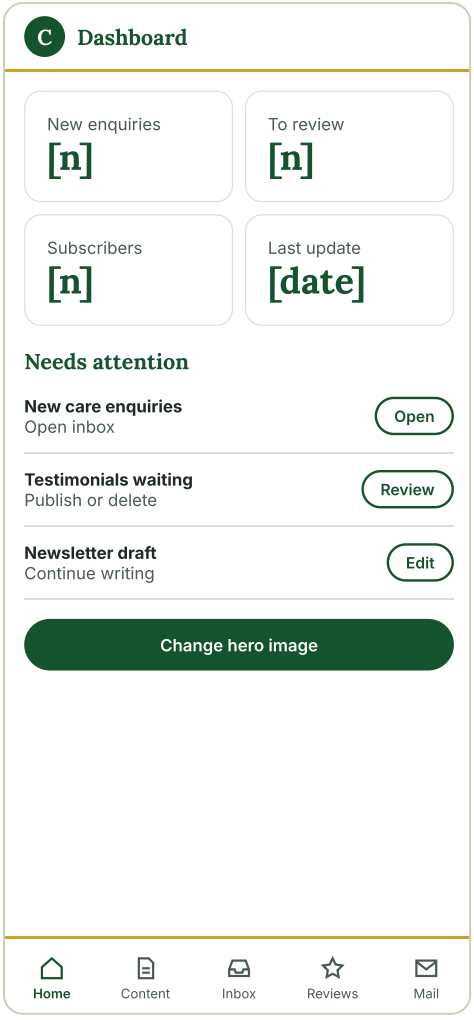

Newsletter

- Write a subject and message with simple formatting tools.
- Send a test to yourself before sending to everyone.
- See the number of subscribers and a list of past newsletters.
- Subscribers join from the public website.

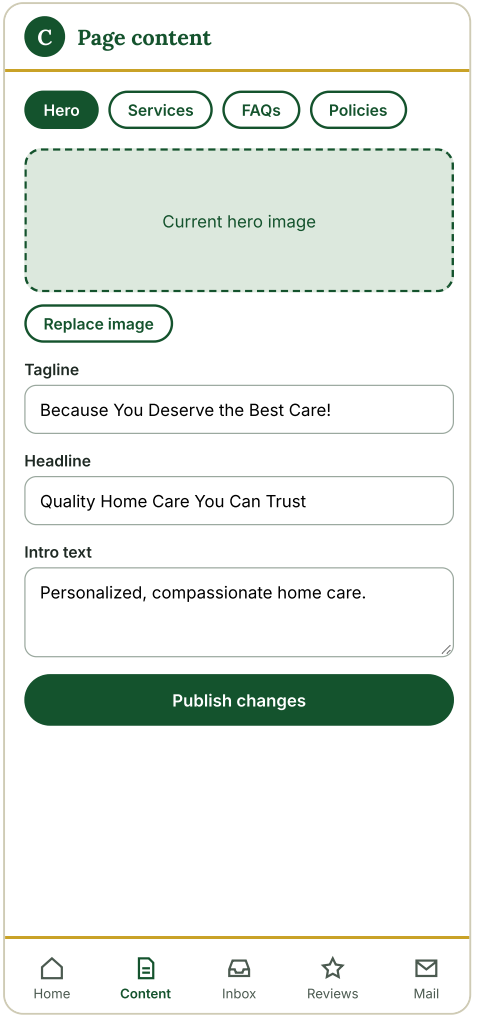

MOBILE SCREENS

Console on a phone

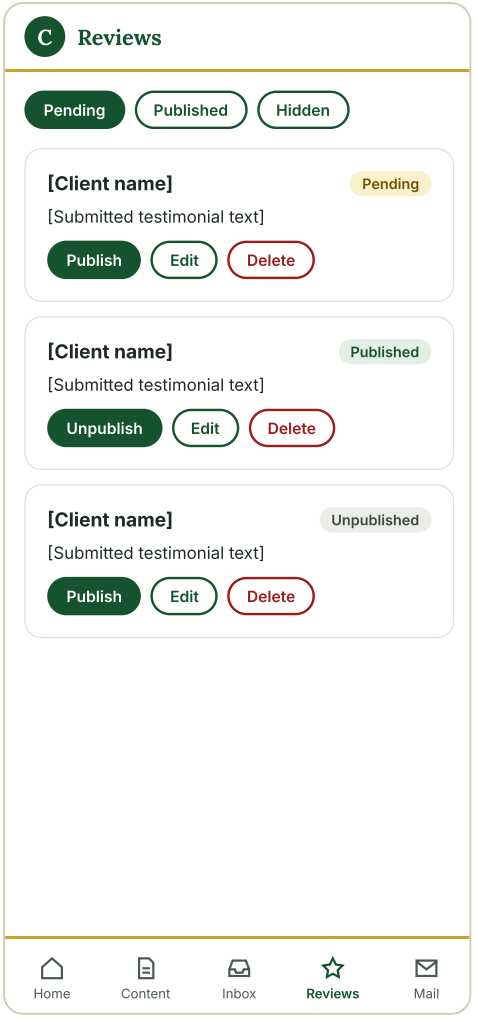

Dashboard

Counters and shortcuts at a glance, with a bottom menu for Home, Content, Inbox, Reviews and Mail.

Page content

Switch between Hero, Services, FAQs and Policies, edit the text and publish from your phone.

Reviews

Approve, hide, edit or delete testimonials with large, easy to tap buttons.
