CEDAR HEALTHCARE, LLC

Public Website UI/UX Design

Screens and flow for the Cedar Healthcare website on desktop and mobile.

Prepared for Cedar Healthcare, LLC
November 2026

OVERVIEW

How the website works

A welcoming, easy to read public website that tells families who Cedar Healthcare is, what care is offered and how to get in touch. Everything on the page can be updated by Cedar staff from a private console, so the site never goes out of date. On phones the website looks and feels like an app, with a menu fixed at the bottom of the screen.

A VISITOR'S JOURNEY

Home
See the tagline, hero photo and a clear call to action

›

Services
Read the six types of care offered

›

Stories & FAQ
Read client stories and common questions

›

Contact or subscribe
Request care or join the newsletter

›

Cedar replies
Staff see every request in the console

COLOURS TAKEN FROM THE CEDAR FLYER

Deep green
#14532D

Cream
#FBF7E8

Gold
#C9A227

Sage
#DCE8DD

Green leads for headings and buttons. Gold is kept for thin accent lines so the page stays calm and clear.

CEDAR CAN UPDATE FROM THE CONSOLE

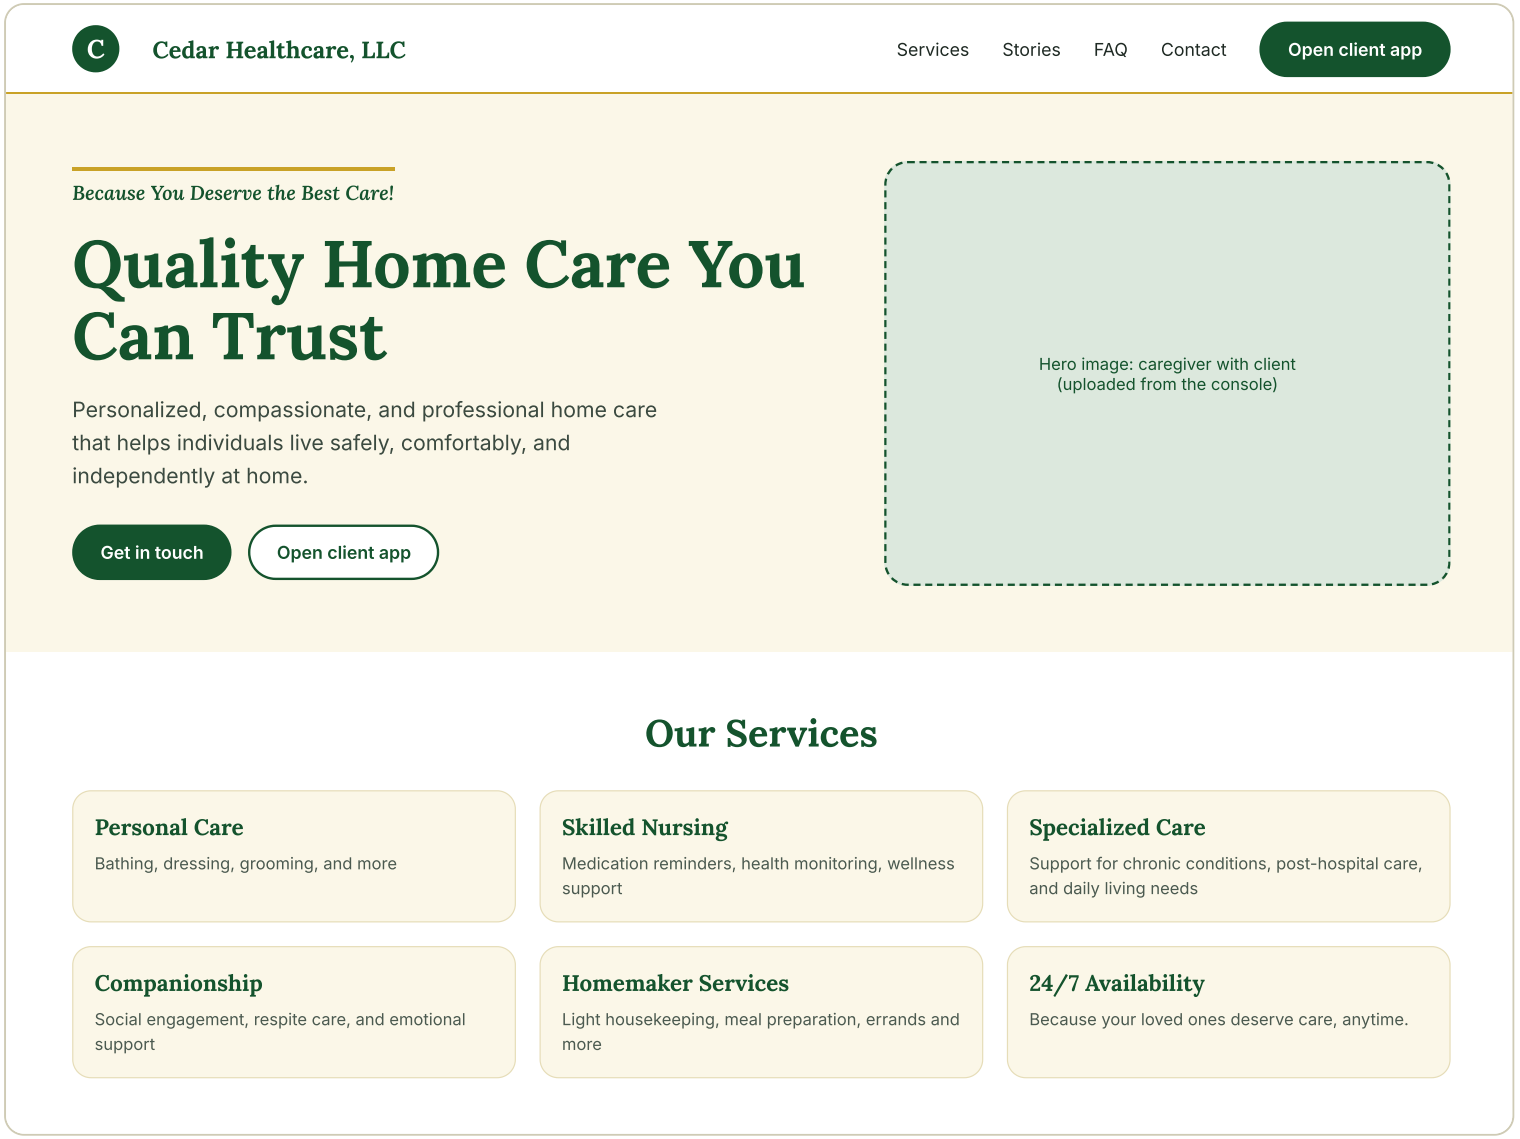

- Hero image, tagline and headline
- Services, mission and vision
- FAQs, privacy policy and terms of use
- Published client testimonials

Text shown in [square brackets] is sample content that will be replaced with Cedar Healthcare's real content. Photos are placeholders.

DESKTOP

Home: hero and services

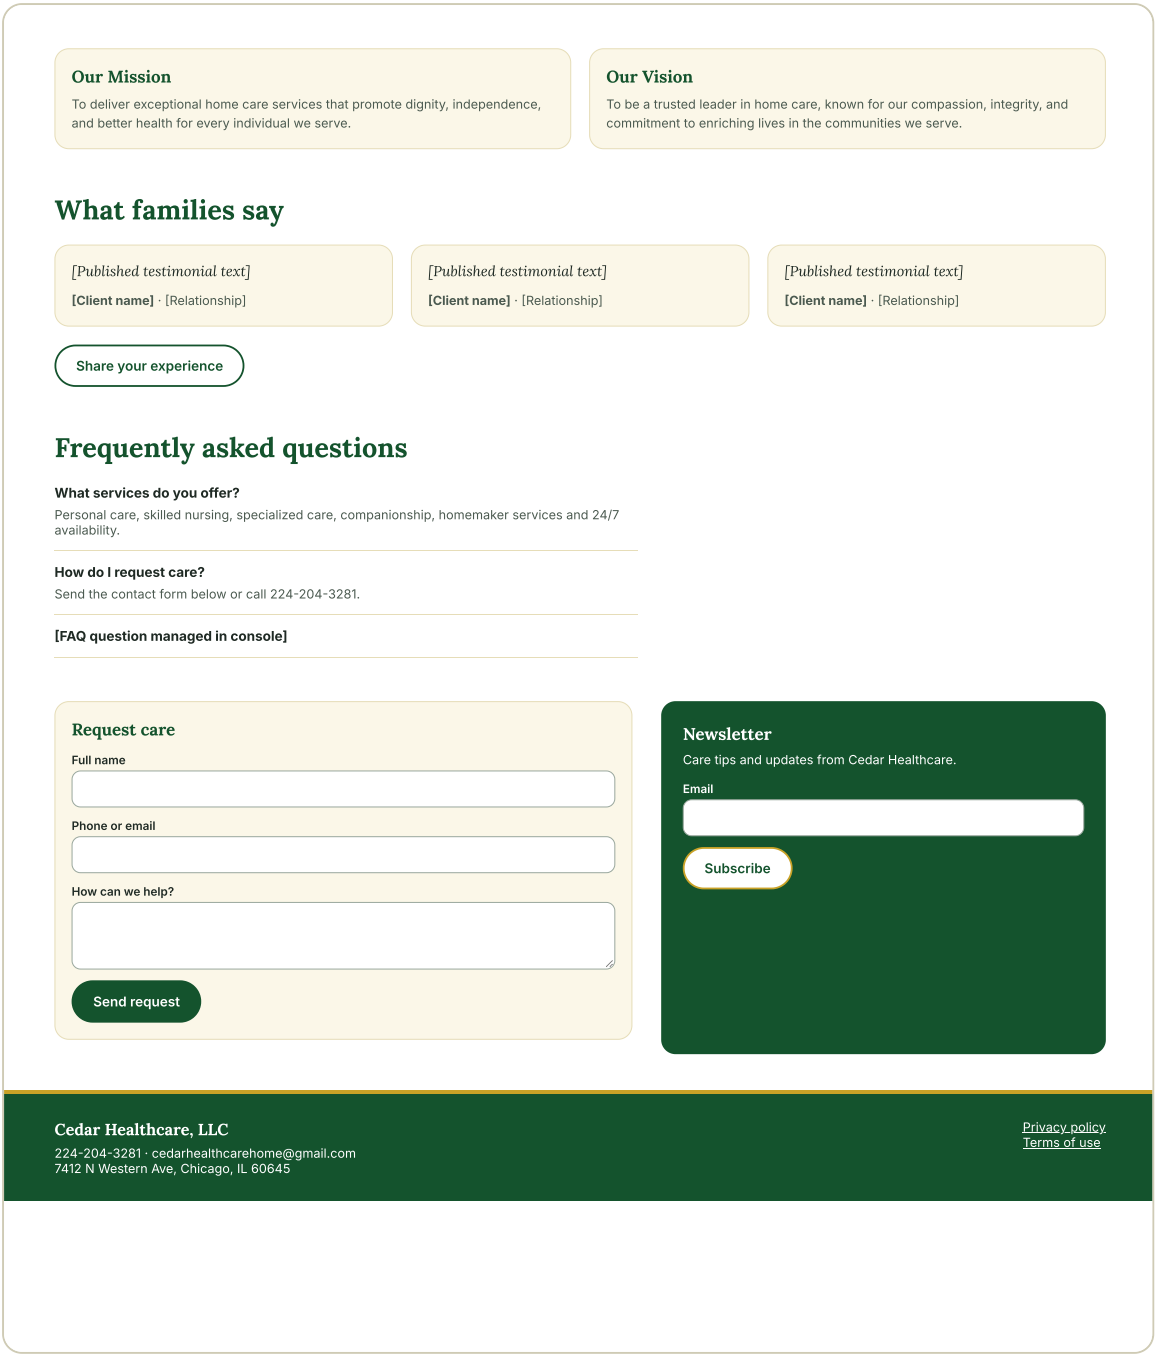

- A top menu gives quick links to Services, Stories, FAQ and Contact.
- **Open client app** takes clients to their portal sign in. The admin console is never linked from the public site.
- The hero shows the tagline, headline, short introduction and two buttons next to a large photo. All of it can be changed from the console.
- The six services appear as clear cards that can be edited or reordered.

DESKTOP

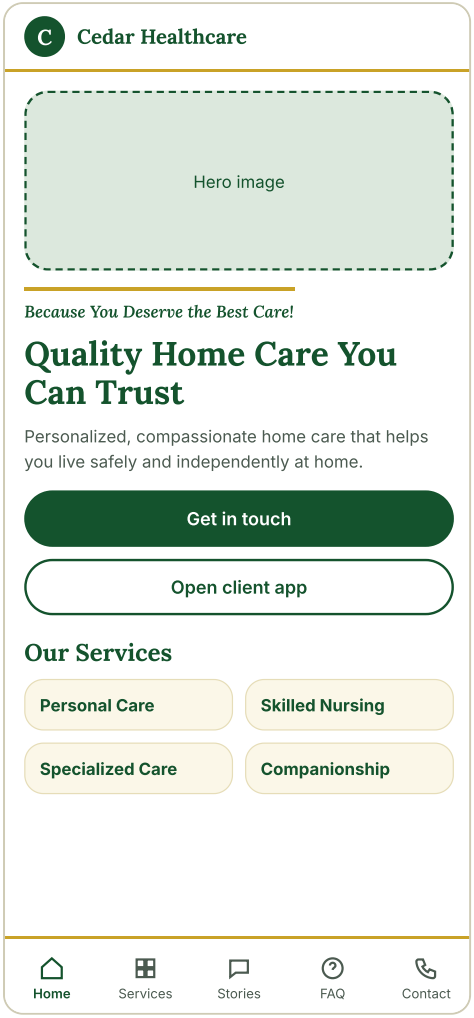

Sections and footer

- Mission and vision sit together so visitors understand Cedar's values quickly.
- The stories section shows only testimonials that staff have published. **Share your experience** lets clients send one for approval.
- FAQs answer common questions and are managed from the console.
- The request form sends enquiries to the console inbox. The newsletter box collects subscribers.
- The footer carries contact details, the privacy policy and terms of use.

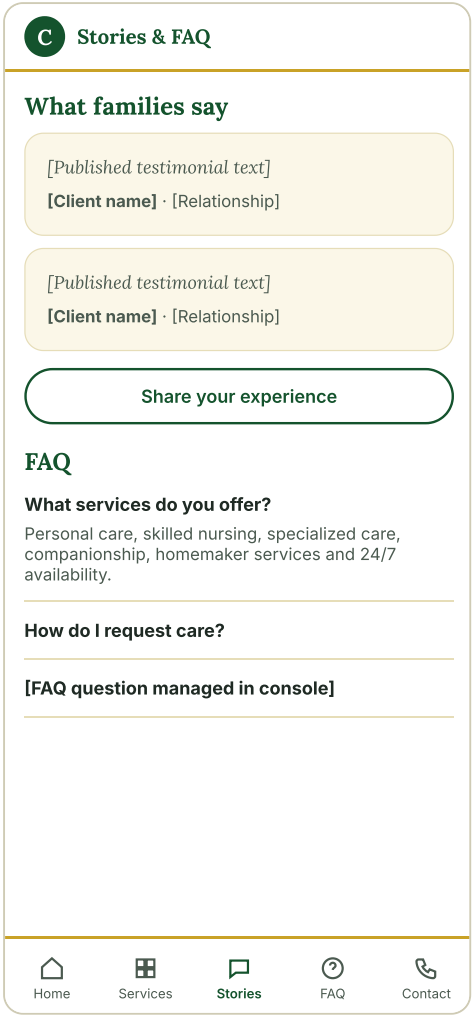

MOBILE SCREENS

Website on a phone

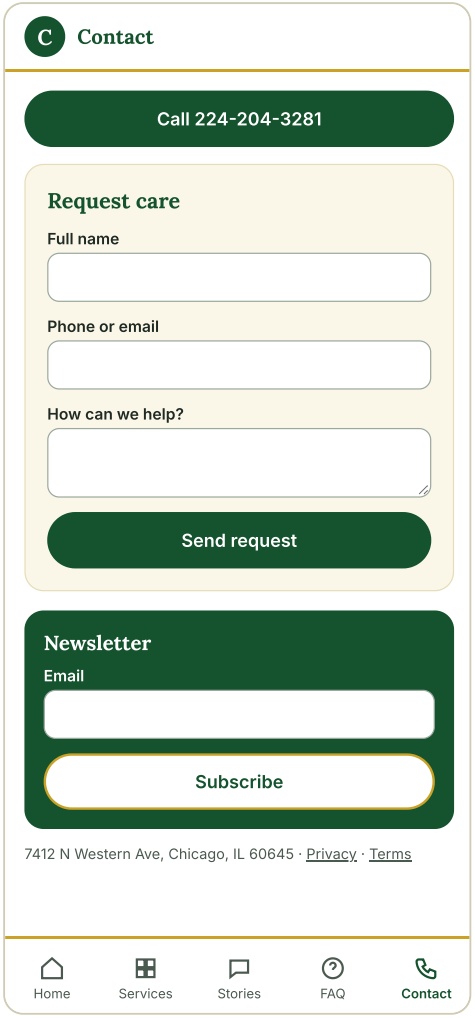

Home

Bottom menu with Home, Services, Stories, FAQ and Contact. Big buttons for calling Cedar and opening the client app.

Stories and FAQ

Published client stories and questions on one easy to scroll screen, with a button to share an experience.

Contact

Tap to call, send a care request or subscribe to the newsletter, with the address and policy links below.
